Appendix 3. Submission Guidelines

The Synopsis should not exceed 6,000 characters with spaces including all elements (information about the authors, title, references).

The Article should not exceed 24,000 characters with spaces including all elements (information about the authors, title, abstract, keywords, references).

Preferred text editor: Microsoft Word; page format: A5; font: Times New Roman; font size: 11 pt. Line spacing: single. Text should be aligned to the page width. First line indents: 5 mm. All margins: 2 cm.

The authors' initials and last names are typed in capital letters, aligning to the center of the first page. Next is the place of work or study (institution, city). Then include the title of the article in capital letters.

A mandatory requirement for an article is a short abstract (4–5 sentences) and keywords (up to 7). After the keywords in Russian, the author should put information about the author, the title of the article, abstract, and keywords translated into English. Leave one line empty and print the body text.

To insert formulas, use the built-in features of Microsoft Word: Equation or MathType. Figures and graphics should have a clear black-and-white image (the collection will be published in black and white). Insert them in the text of the article and send to the Organizing Committee in a separate file.

Do not tone the table heads, do not print text in bold. Individual table cells may be highlighted in gray or black only if the tone carries a meaningful message.

Bibliographic references are made in square brackets (for example, [2, p. 64]). The reference list is located at the end of the article and styled in accordance with the GOST requirements. The text should be carefully corrected and edited by the author (be sure to check the article for spelling and grammar). The materials submitted to the conference and reviewed are published in the author's edition.
