

Maria Uramová - Mariana Považanová - Anna Vallušová: Significance of measurement and analyses of unpaid work in socio-economic development

Abstract

The paper deals with the issue of unpaid work and its significance in socio-economic development. Its aim is to highlight the importance of unpaid work in the context of socio-economic development and summarize the most important findings of research devoted to unpaid work in Slovakia which is carried out in Matej Bel University for more than 5 years. In the first part, it stresses the significance of measurement and analyses of unpaid work. Second part summarises most important results of the primary research carried out by the research team.

Key words

unpaid work, household economics, time use survey, Slovakia
